**To whom it may concern,**

I am currently the owner and manager of a small cosmetics brand and eCommerce store who is looking to pursue my dreams in web development. With an eye for design and aesthetics, a passion for seeing ideas become reality and experience in team building and collaboration, I feel like I would make a unique fit in your development team!

I have spent the last few years establishing my makeup and body painting by building a brand online, creating social media content and developing an eCommerce store. Web design and development has been a passion since childhood, and through my work I found myself enjoying that passion once again in surprising ways. Through creating content for social media, I fell back in love with graphic design and while building the website for my cosmetics brand, I remembered the joys of seeing website projects conceptualized and completed. Deciding to pursue these dreams, I enrolled in coding classes at Arizona State University where I maintained an A grade and enjoyed working on team projects with other aspiring developers.

I hope to find a position in web development where I will have the opportunity to work on web applications that help build the future of the internet. Thank you for taking the time to consider me!
